

**Amendments to the Specification:**

Please replace the paragraph beginning on page 1, line 13-16, with the following rewritten paragraph:

As a method of forming such a ferroelectric film, a spin coating method using a sol-gel material or ~~an MOD-~~ a Metallo Organic Deposition (MOD) material has been known. The spin coating method has advantages in that composition of the film is easily controlled and particles are not generated in comparison with a sputtering method.

Please replace the paragraph beginning on page 2, line 11-15, with the following rewritten paragraph:

With this ceramic material coating method, the ceramic material may include at least one of a sol-gel raw material and an MOD raw, ~~the sol-gel~~ sol-gel raw material including at least one of a hydrolysate and a polycondensate of the complex oxide, the MOD raw material including constituent elements of the complex oxide in an organic solvent.
